The list of winners will be published by the University at www.univet.hu website.

More information about the application can be found on

<http://univet.hu/en/egyesem/palyazati-projektek/udomanyi-adatpotlas-erositese> page under the General Terms and Conditions.

Further requirements for the applications:

The publication of 1 literature review in The Hungarian Veterinary Journal in Hungarian or in both Hungarian and English (in a non-strictly veterinary subject another hungarian reviewed scientific journal is also acceptable), as well as participation on SSA (TDK) conference in the research topic within one year after the end of the research period.

**More detailed explanation
of the food security theme
of the applications:**

One of the long-term objectives of the EFOP-3.6.3-VEKOP-16-2017-00005 project is to assist in the accomplishment of complex agro-economic developments that offer innovative R & D solutions in animal husbandry and veterinary medicine in addition to crop production and protection technologies. This may include, among others, food hygiene, epidemiology, parasitology, animal health management, animal protection, pharmacy and all other veterinary disciplines related to food safety. Considering the environmental aspects, researches and developments of fisheries management, forestry and wildlife management are also important.
