

**Dr. Katarina Jewgenow**

Professor

Department of Reproduction Biology

Leibniz-Institute for Zoo and Wildlife Research

Humboldt-University Berlin, Faculty of Life Science

Berlin, Germany

Dr. Katarina Jewgenow is the head of the department Reproduction Biology and the deputy director of Leibniz-Institute for Zoo and Wildlife Research (IZW), Germany's primary institution for biodiversity and conservation research. In addition, she is appointed as a Professor at Humboldt-University Berlin, the faculty of life science. She received a diploma in Medical Biology from 2<sup>nd</sup> Moscow State Medical Institute, Moscow, Russia. She started her scientific carrier at the Institute for Mammalian Research at the Academy of Science of GDR in Berlin. She was involved in the production of the first in-vitro-calf produced in Europe in 1984. Since 1992 she has been employed as a senior scientist at the IZW. Dr. Jewgenow's research aims on reproduction biology of wildlife animals, with emphasis on carnivores. In particular, she focuses on cryopreservation of genetic resources, gametogenesis in mammals, non-invasive monitoring of hormones and contraception of wildlife and feral animals. She published more than 100 articles and 5 book chapters.
