

Dear Pet keepers,

The Hungarian government declared **state of emergency** on 12 March 2020 due to the COVID19 epidemic and introduced regulations. In order to keep these regulations, we require the following security measures to be kept when visiting the Small Animal Clinic of the University of Veterinary Medicine:

- Move behind the security cordons!
- Only one person at a time can be at the patient reception for registration.
- After registration, please, wait outside the clinic.
- Please, stay 1-1.5 meters away from each other and from the patients.
- Please, wait patiently after registration until you are called in to the consulting room.
- Please, do not move further from the area marked out (e.g. Do not take a walk in the park!)
- Visiting sick animals at the Clinic is **FORBIDDEN** as from today, 17 March 2020!
- The **Small Animal Clinic Apothecary** –accordingly to the effective edict 46/2020. (III.16.) – **is open until 3 p.m.**

Thank you for your understanding and co-operation!

University of Veterinary Medicine
