

Young, growing veterinary practice is looking for backup

Our practice continues to grow. Therefore, to strengthen our team of veterinarians, we are looking for a veterinarian, either immediately or by appointment.

Our practice area is located in the districts of *Kirchdorf* and *Steyr-Land* in Upper Austria, 15 km south of the city *Steyr*, 40 min towards *Linz*, 3 hours towards *Munich*, 2 hours 15 min towards *Vienna* and 3 hours 45 min towards *Prague*. Our areas of responsibility include all activities that a rural veterinary practice

could think of, from the treatment of individual animals to the care of entire animal populations, from cattle and pigs to sheep and goats. We also reckon horses among our patients. In our newly built small animal practice with in-house laboratory, we treat an increasing proportion of domestic pets.

Our customers are characterized by their open and modern manner. They are also very positive towards graduates and are always willing to try out new ideas and approaches.

The workload is 60 – 100%, depending on your wishes.

We offer a varied job that includes routine activities such as artificial insemination and pregnancy tests, but also the diagnosis and treatment of diseases of individual animals. Furthermore, we carry out all surgeries that are possible in rural barn conditions, such as caesarean section, castration, dehorning and claw amputation.

Intensive personal training is important to us. Since we have several employees in our practice, other team members are always available to provide support.

A long-term work schedule guarantees regular working hours for all employees. Any overtime will of course be paid. We offer a fair salary based on personal experience (minimum salary 3000 €, overpayment depending on experience and qualification).

We may also help in finding accommodation or offer temporary accommodation at our office.

What we wish for:

- Pleasure and motivation at work as a veterinarian
- Interest in large and farm animals, but also in small animals
- Willingness to undertake ongoing further training
- Team spirit
- Proper language skills (minimum of B1 German level)

What we offer:

- Varied work in small and large animals
- Extensive training
- Regular working hours
- Fair remuneration

University graduates are very welcome in our practice. We may also visit prior or you may go through some weeks of practical training as part of your studies.

Further information to find on our homepage www.tierarztbuechel.at. Please send your application to office@tierarztbuechel.at or call 0043 664 101 6898.

Minimum salary: 3000 €
