

Dear First Year Student,

I would like to extend my warm welcome to you on behalf of the university now that you have been accepted as our first-year veterinary student.

I would like to inform you that UNIVET offers a peer-mentoring program for freshers. The program begins in the first school week and connects you to an upper-year student as your very own peer-mentor who you can meet once a week for the period of the first, most stressful 8 weeks of school. Your mentor would help you find answers to questions about UNI life and academics. As a mentee (first-year student) you will not only get assistance from someone who has personal experience of succeeding in the first year but you can take part in fun team-building events, and meet with freshers and upper-year students. If you are interested in the peer-mentoring program please, learn more about it by reading through our flyer: https://univet.hu/univet/peermentoring/freshman_flyer.pdf and once you decided to join fill in the application at the link below: <https://forms.gle/5N9p7DMdCBJWqdgD9>

Please, note that we have a limited number of spots depending on the number of mentors available in the given semester. Once you applied and accepted you will be notified about the program details. If you have any questions please, e-mail them to the SAM-buddy program coordinator.

Look forward to seeing you in the program

Kind regards,

Levente Somogyi

Student mental health counselor

SAM-buddy program coordinator

Office: Counseling office in building "H" first floor NW wing
