

Anatomy Final, Practical Tasks

1. Gl. parotis, ductus parotideus, ln. parotideus, n. facialis
2. N. zygomaticotemporalis, n. zygomaticofacialis, n. frontalis, gl. lacrimalis
3. M. nasolabialis, n. infraorbitalis, n. buccalis, n. mentalis, v. facialis and its branches, gl. zygomatica
4. M. digastricus, gl. mandibularis, gl. sublingualis and their ducts, lc. mandibulare, ln. retropharyngeus medialis, v. facialis
5. N. hypoglossus, a. lingualis, n. lingualis, n. sublingualis, n. mylohyoideus, n. alveolaris mandibularis
6. Tongue, its musculature, nerves and blood supply
7. M. sternothyroideus, m. sternohyoideus, m. hyothyroideus, gl. thyroidea, a. carotis externa and its branches, vagus group
8. Mm. constrictores pharyngis medii et caudales, cavum pharynges
9. Larynx, nerves and blood supply
10. Muscles of the thoracic girdle, nn. pectorales craniales, nn. pectorales caudales, n. thoracicus longus, n. thoracicus lateralis, n. thoracodorsalis
11. The root of plexus brachialis and branches at this level, a. et lc. axillaris
12. N. medianus, n. ulnaris, n. radialis, n. musculocutaneus, a. brachialis till the elbow joint
13. Carpal and digital extensors of the forelimb, its nerves; superficial venous system and its relationship to the deep system in the forelimb and to the v. jugularis externa
14. Carpal and digital flexors of the forelimb, their nerves, blood supply of the forearm
15. Medial muscles of the thigh, canalis femoralis and its features
16. N. ischiadicus, n. gluteus cranialis, n. gluteus caudalis, dorsal, caudal and deep muscles of the buttock
17. M. quadriceps femoris and the caudal muscles of the thigh, superficial veins of the hindlimb
18. Tarsal flexors and digital extensors of the hindlimb, their nerves and vessels
19. Tarsal extensors and digital flexors of the hindlimb, their nerves and vessels
20. Arcus aortae, aorta thoracica, truncus sympathicus, n. vagus (thoracic portion), n. phrenicus.
21. Pericardium, cor
22. Abdominal wall, rectus sheet and its nerves
23. Canalis inguinalis, a. pudenda externa, lnn. inguinales superficiales, n. genitofemoralis
24. Diaphragm, paired and terminal branches of the aorta abdominalis, ggl. coeliacum, ggl. mesentericum craniale, ggl. mesentericum caudale
25. Duplicaturae serosae cavi abdominis et pelvis
26. Hepar, lien, gaster- with their suspension and blood supply
27. Small and large intestines- with their suspension and blood supply
28. Penis and its musculature, scrotum, testis, funiculus spermaticus- with their suspension and blood supply
29. Ovaries, uterus- with their suspension and blood supply
30. Kidneys, canalis urinalis, urinary bladder- with their suspension and blood supply
