The purpose of the workshop is to provide postgraduate continuous education for small animal surgeons/practitioners in the field of HEAD AND NECK SURGERY, with special emphasis on some techniques which are relatively infrequent in the practice. The workshop consists of well-illustrated oral presentations (dry lab) in the first part as well as subsequent small group (4 participants/group) practical training (wet lab) on cadavers supervised by a Diplomate of ECVS in the second part. The maximum number of the workshop is 20 persons.

**Detailed program:**

9.00 – 9.15	Registration, welcoming
9.15 – 10.00	Special surgical procedures on the head I: TECA+LBO
10.00 – 10.45	Special surgical procedures on the head II: surgery of the salivary glands
