

# Equine Reproduction Vacancy

## Externship Program

Vacancies for March to August

for one of the UK's leading

## Embryo Transfer, OPU/ICSI & Artificial Insemination Centre

We are seeking veterinary undergraduate students (4th/5th year) interested in equine reproduction and foal medicine. You will work during the main breeding months alongside our four resident stud vets: including our resident veterinarian diplomate in equine reproduction.

Students will participate in all aspects of clinical activities. Including exposure to:

- Estrus cycle management and manipulation
- Artificial insemination & embryo transfer of fresh, chilled, and frozen embryos
- Neonatal care and foal medicine
- Management of recipient mares

One vacancy per month, with onsite accommodation provided, bookings taken for 2025, 2026 and 2027

To apply please send email with your CV to Edward Matson
