

Our client is an independent association of veterinary practices and veterinary clinics that operates nationwide. Through targeted investments and a sustainable development concept, the parent company based in northern Germany forms veterinary competence networks. The individual locations are managed independently and at the same time common processes and respective strengths are linked in a targeted manner.

In the context of the planned reorientation of a small, rural equine clinic near an attractive Hanseatic town in Schleswig-Holstein, we are looking for the newly created position

All-rounder (m/f/d) Equine Medicine

The task:

- You will take on a central role in a young, family team consisting of five veterinarians, TMFAs and other staff.
- Your clientele will include individual clients and entire stables, whom you will care for in orthopaedic, dental and also general reproductive medicine issues.
- You will look after your patients in a modern, well-equipped practice.
- Hospital-level technology enables you to perform sophisticated diagnostics and operations
- You will cooperate skilfully with your colleagues at the surrounding sites of the clinic network and thus promote the proportion of referral patients.
- With your dynamic nature, you will support the team in the expansion of the clinic by setting comprehensive accents through your professional interests and competences
- Immediately or prospectively, you will share the management with a colleague with many years of experience

The requirements:

- You have studied veterinary medicine, your focus and passion are horses.
- A qualification as a specialised veterinarian is welcome, but not a must
- You have spent your first professional years in an equine practice or clinic
- Your knowledge includes general equine medicine or preferably an appropriate specialisation
- You like to be in contact with other people and radiate that as well

The offer:

Seize the extraordinary opportunity to take on a weighty position within a young and success-hungry team in a spirit of optimism! Within a manageable radius around the clinic, long-standing customers and the versatile spectrum of equine medicine await you. With the innovative practice group as a supporting force in the background, you can make your mark as a successful veterinarian at this location. Through your own ideas, you can recreate the potential of the small and tranquil clinic, set the tone and develop it into a regionally recognised centre of excellence. Any form of development and change is welcome! In addition to the existing operating theatre, treatment room and small laboratory, the clinic is currently being expanded to include a longeing circle and another stable building in order to meet the upcoming challenges in a region with high demand. In addition, you and your colleagues will benefit from regular internal and external training opportunities offered by the clinic association.

The clinic's location is just as captivating due to its proximity and optimal connection to a very attractive Hanseatic city as it is to the neighbouring coast. This location thus offers countless opportunities for families and globetrotters alike.
