

PUBMED

PUBMED.NCBI.NLM.NIH.GOV

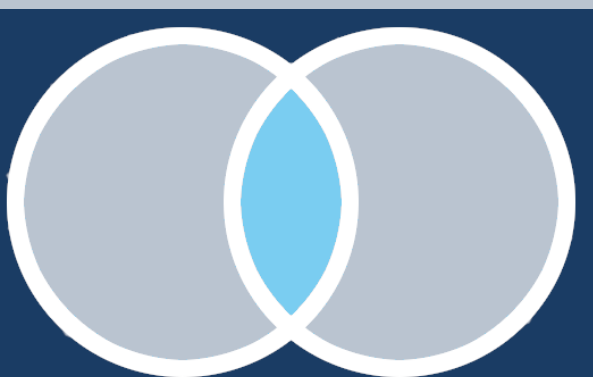

PubMed is a free bibliographic database supporting the search and retrieval of biomedical and life sciences literature.

SIMPLE SEARCH

In the case of a simple search we can search by entering the terms in the search box, but we can also use operators and operation signs for more accurate results.

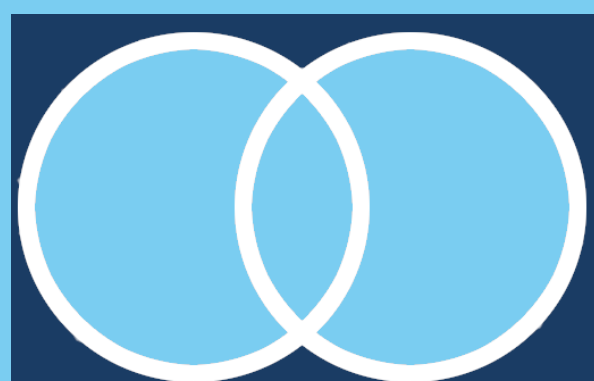

AND OPERATOR

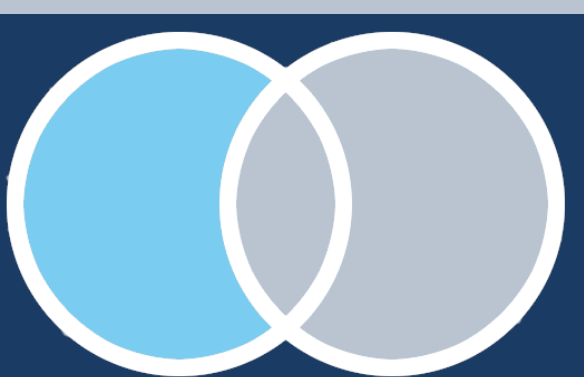

"AND" requires the co-occurrence of the search terms. For example, a "dog and cat" search will only retrieve results that include all the search terms.

OR OPERATOR

For "OR", if any of the search terms occur, that document will be added to the results list. For example, a "dog or cat" search will show all results that include either dog or cat (or both).

NOT OPERATOR

"NOT" excludes the retrieval of terms from your search. For example, a "dog not cat" search will only include those results that have a dog but no cat at all.
