

## Angiologia

### Cor

atrium cordis (dex. et sin.)

ventriculus cordis (dex. et sin.)

Ostium atrioventriculare (dext. et sin.)

valva sinuatrialis [valva atrioventricularis dextra]

valva tricuspidalis

aorta ascendens

arcus aortae

lig. aortae

truncus brachiocephalicus (dex. et sin.)

a. carotis communis (dex. et sin.)

truncus vertebralis

a. carotis interna

a. carotis externa

a. carotis cerebralis

a. ophtalmica externa

a. subclavia

a. axillaris

a. incubatoria

aorta descendens

a. segmentales truncales [a. intersegmentales truncales]

a. segmentales synsacrales [a. intersegmentales synsacrales]

a. coeliaca

a. mesenterica cranialis

a. mesenterica caudalis

a. renalis cranialis

a. ovarica cranialis sin.

a. oviductus cranialis sin.

a. testicularis (dex. et sin.)

a. iliaca externa

a. femoralis

a. tibialis cranialis

a. metatarsa dorsalis

a. ischiadica

a. renalis media

a. renalis caudalis

a. sacralis mediana

a. iliaca interna

a. pudenda interna

- v. cava cranialis
  - v. jugularis externa
  - v. subclavia
    - v. axillaris
      - v. profunda brachii
      - v. basilica
- v. cava caudalis
  - v. iliaca communis
    - valva renalis
    - v. renalis cranialis
      - vv. efferentes
    - v. renalis caudalis
      - vv. efferentes
  - v. portalis renalis caudalis
    - vv. afferentes
  - v. iliaca externa
  - v. ischiadica
    - v. poplitea
    - v. tibialis cranialis
  - v. iliaca interna
    - v. pudenda interna
    - anastomosis interiliaca
  - v. mesenterica caudalis
  - v. mesenterica cranialis
  - v. mesenterica communis
  - v. gastropancreaticoduodenalis
  - v. portae dextrae hepatis [v. portalis hepatis dexter]
  - v. portae sinistrae hepatis [v. portalis hepatis sinister]
  - pars transversa

## **APPARATUS RESPIRATORIUS**

concha caudalis

concha medii

concha cranialis

sinus infraorbitalis

### **larynx [larynx proximalis]**

cartilago arytenoidea

cartilago cricoidea

cartilago praecricoidea

m. dilatator laringis

m. constrictor laringis

## **Trachea**

cartilago trachealis

## **Syrinx**

cavum syringis

pessulus

membrana tympaniformis med.

membrana tympaniformis lat.

lig. interbronchiale

for. interbronchiale

bullae syringis

m. sternotrachealis

m. tracheolateralis

bronchus principalis dext. et sin.

## **Pulmo (dex. et sin.)**

mesobronchus

bronchi lateroventrales

bronchi lateromediales

bronchi mediodorsales

bronchi medioventrales

parabronchus

infundibula

atria

m. atrialis

pneumocapillares

sacci [pneumatici] cervicales

sacci [pneumatici] claviculares

sacci [pneumatici] thoracales craniales

sacci [pneumatici] thoracales caudales

sacci [pneumatici] abdominales

## **Cloaca**

plica coloproctodealis

plica coprourodealis

plica uroproctodealis

coprodeum

urodeum

ostium ureteritis

proctodeum

Ventus

## **Organa genitalia masculina**

testis

epididymis

ductus deferens

papilla ductus deferentis

fossa ejaculatoria

### *phallus nonprotrudens*

corpus phallicum medianum

corpus phallicum laterale

corpus lymphaticae [plica lymphaticae]

### *phallus protrudens*

corpus fibrolymphaticum dextrum

corpus fibrolymphaticum sinistrum

sulcus phalli

aditus at cavitam phalli

cavum phalli

pars cutanea phalli

pars glandularis phalli

basis phalli

flexura phalli

apex phalli

m. retractor phalli

## **Organa genitalia feminina**

ovarium

oviductus

infundibulum

magnum

isthmus

uterus

vagina

ostium cloacale oviductus sinistri

## **Glandula cutaneae**

gll. uropygii

Appendices integumenti

proc. frontalis

palea

lobus auricularis

caruncula cutaneae

papillae barbae

## **Pennae**

scapus

    rachis

    calamus

hyporachis

vexillum

    ramii

    rugae prox.

    rugae dist
