

Informations about the summer practice

We would like to inform you about the **obligatory summer practice** after the IV. year.

At the end of the fourth year, during the summer holiday every student must participate in a **4 week- long** practice between the end of the exam period and the beginning of the next semester.

In 2022 it will be **from the 4th of July to the 11th of September**.

Students should spend their summer practice at a facility which provides professional health care for at least one of the main **domestic animal species** (horses, ruminants, swine, dogs or cats). Students **can spend 2 weeks** from the 4 weeks period at places **dealing with exotic animals**, for example at a zoo.

Regarding to the limited resources of the University's clinical establishments, the **Clinics of the University will mostly receive the Hungarian students**. Because of it, the University encourages the members of the international class to **spend their summer practice in their home country**.

However, it is still possible for some students from the international class to join the clinical work in Hungary. You can spend the summer practice at the **Horse Clinic at Üllő** or at the **Small Animal Clinic** in Budapest, but only in case of **remaining free places** after the closure of the sign-up period organized for the Hungarian students.

This practically means, that a few international students will get this opportunity, and the final decision can only be made by the heads of the establishments after the schedules of the Hungarian shifts are ready (in May/ June). Therefore it is advisory for you to **find a clinic/veterinarian** in your home country during the spring period and not to await the above mentioned decision. We will send an e-mail to the class representative to ask her to collect the names of those who are interested in participating the clinical work at one of the University's establishments.

For your extramural practice (out of the University) to be accepted, following the summer practice, **a certificate and evaluation form must be filled out by the supervisor** and this certificate must be given to the Obstetrics Department in the first week of the next semester.

The above mentioned **certificate** can be downloaded from the website of the Department of Obstetrics and Farm Animal Medicine Clinic.

If you have any further questions about the summer practice, please feel free to contact dr. Anna Csepreghy (csepreghy.anna@univet.hu) or dr Mónika Bacsa

(bacsamonika@univet.hu), who are responsible for the organisation from the Department and Clinic of Reproduction.

Budapest, 10th of March, 2022.

Prof. Dr. Rátky József
The Head of the
Department of Obstetrics
and Food Animal
Medicine Clinic
