

General information and requirements for Small Animal Medicine II 2022/2023 fall semester

Preliminary requirements: Small Animal Medicine I

Credit: 4

Number of lectures: 45x45 min

Number of practicals: 45x45 min

Lectures:

The program of the lectures can be found at the description of the subject in NEPTUN and it will be sent to the contact student at the beginning of the semester. Lecture topics will cover the following: Internal Medicine and Surgery of the respiratory organs and the cardiovascular system; surgery of hernias. *In case of fully online course, lectures will be held at the scheduled time and streamed for students real time.* General information and lecture notes will be available at the e-learning website in Moodle. The venue of each lecture is indicated in the timetable.

Practical trainings/Labs:

Practical topics are available on the e-learning website, and will be sent to the contact student at the beginning of the semester. Knowing the lecture material of the actual topic is necessary for the practical lessons. In normal circumstances a written test or oral presentation is a part of each practical lesson. Nevertheless, in case of COVID situation, this sort of entrance test may be cancelled. White coat, thermometer and stethoscope are obligatory for the practical lessons. Attending the practical trainings is obligatory. Missing only acceptable in case of illness or official university activity (e.g.: clinical shift). Missed Internal Medicine practical work must be repeated during the last week of the semester after personal consultation. In case of missed practice of Surgery oral report is necessary with the responsible teacher after consultation. Verification of the missed practice is necessary. Temporary change of groups for the practical training is strictly unacceptable, and only permitted in case of illness proved by medical document. Students missing more than it is allowed by the Academic rules and regulation cannot have their black book signed for the semester.

In case of a fully online course, teaching materials of practical trainings will be available for students during the semester.

Practical halls:

Internal Medicine: László Papp seminar room (Department of Internal Medicine, 1st floor) or Buildin M practical room. For further information please see the thematics.

Surgery: building B practical rooms

Grading of the semester will be based on:

- the results of the 2 written tests being held during the semester according to the previous topics of the course.
