

**Programme of Lectures in Parasitology
3rd Year
2024/2025 Second Semester**

II. 3.	Introduction to parasitology. Introduction to protozoology and "Sarcomastigophora"
II. 4.	Tropical trypanosomoses, dourine
II. 10.	Leishmaniosis, giardiosis. Bovine and avian trichomonoses.
II. 11.	Histomonosis, amoeboses.
II. 17.	Introduction to phylum Apicomplexa. Eimeriidae: coccidiosis of the chicken.
II. 18.	Control of chicken coccidiosis, coccidiosis of other birds.
II. 24.	Coccidiosis of the horse, cattle, small ruminants. Coccidiosis of the rabbit, pig, carnivores.
II. 25.	Cryptosporidiosis.
III. 3.	Toxoplasmosis. Neosporosis
III. 4.	Hammondiosis. Besnoitiosis. Sarcocystiosis I.
III. 10.	Sarcocystiosis II, klossiellosis, hepatozoonosis. Malaria, haemoproteosis, leucocytozoonosis.
III. 11.	Babesiosis.
III. 17.	Theileriosis, cytauxzoonosis. MICROSPORA: encephalitozoonosis. CILIOPHORA: balantidiosis, blastocystiosis.
III. 18.	Summarizing review of protozoology.
III. 24.	Introduction to veterinary entomology. Lice.
III. 25.	Fleas.
III.31.	Bugs. Darkling beetle. Mosquitoes. Blackflies. Biting midges. Sandflies.
IV. 1.	Horse- and deerflies. Tsetse flies. Forest flies.
IV. 7.	Muscoid flies. Myiasis-causing fly species.
IV. 8.	Traumatic myiasis.
IV.14-21.	EASTER HOLIDAY
IV. 21.*	Hypodermosis. Gasterophilosis. Oestrosis.
IV. 22.	Mange mites I.
IV. 28.	Mange mites II.
IV. 29.	Demodectic mites.
V. 5.	Soft ticks. Hard ticks,
V. 6.	Cheyletiella, red and other mites.
V. 12.	The tongue worm. Control of arthropods.
V. 13.	Summarizing review of veterinary entomology.

*Class changes will be discussed by the Lecturer Professor during the term.

Budapest, 3rd of February, 2025

 Dr. Sándor Hornok
 Head of Department
