Explanatory notes:

LPS: lectures/practicals in hrs per semester (=15 weeks). **Type:** obligatory/elective. **Req:** requirement at the end of the semester. See below. **Credit:** granted if subject's requirements fulfilled. **Course:** "Not signed" if too many lessons missed or too weak performance during the semester (ergo not allowed to attempt exam). **Grade:** three- or five-scale-system

Requirements at the end of the semester: **Ex=** Exam (at the end of the semester, scale 1-5). **Pr=** Practical grade (scale 1-5). **A=** Not Accepted/Accepted/Excellent (three scale-system). **S=** Signature (no exam at the end of the semester)

From the academic year 2016/2017 the ECTS (European Credit Transfer System) was introduced.

Active status: an active student is formally enrolled for the given semester and participates in the university's academic activities, including lectures, practical sessions, and other coursework. Active students are eligible to sit for exams, receive grades, and earn academic credits.

Inactive status: the student retakes exam(s) in certain subject(s) for which they have already fulfilled the course requirements (i.e., they have previously attended the corresponding lectures and practical sessions but did not pass the exam). Typically, no attendance or practical work is required; however, exceptions may apply in certain subjects. The semester is considered active, meaning that the student's enrolment status remains valid. If the missing exam(s) is(are) passed, they can return to active status in the following semester.

Passive status: the student has formally suspended their studies for the semester. They do not attend classes or take exams, and their student status is paused for that period. No credits or grades can be earned during a passive semester.
